SUMMARY

Full-stack engineer who designed and shipped Ledgr.ai — an AI-powered finance dashboard (Next.js 15, Express, PostgreSQL, OpenAI) — from scratch to live production with CI/CD. Comfortable across JWT auth, connection pooling, REST API design, and automated deployment pipelines. Seeking SDE / AI / full-stack roles.

EDUCATION

Lovely Professional University

MCA — CGPA: 8.01 / 10

Aug 2021 – Aug 2023

Phagwara, Punjab

Reva University

BCA — CGPA: 8.41 / 10

June 2018 – June 2021

Bengaluru, Karnataka

PROJECTS

Ledgr.ai | *Next.js 15, TypeScript, Express, PostgreSQL, Prisma, OpenAI, Clerk, GitHub Actions* | [Live](#) | [GitHub](#) May 2026

- Architected a production-grade AI finance dashboard as a TypeScript monorepo — frontend on Vercel, backend on Render — fully live with CI/CD in 14 days.
- Built custom Express middleware to verify Clerk JWTs and map them to internal PostgreSQL UUIDs, decoupling auth identity from relational data.
- Integrated OpenAI GPT-4o mini for automatic transaction categorization and monthly spending insights; designed schema with DECIMAL(12,2) and composite indexes for fast queries.
- Resolved Prisma/PgBouncer prepared statement conflicts, dynamic CORS failures on Vercel preview URLs, and UTC date offset bugs in dashboard aggregations.
- Automated CI/CD via GitHub Actions — lint, typecheck, and build gate on every PR; deploy hooks trigger Render backend; Vercel Git integration handles frontend.

Blockchain E-Voting System | *Solidity, Ethereum, React, Node.js, MetaMask, Truffle*

Jan – Apr 2023

- Deployed tamper-proof voting smart contracts on Ethereum using Solidity with MetaMask wallet authentication and a React frontend; published research paper at ICCS 2023 and SSRN.

EXPERIENCE

Zidio Development

June 2024 – Sep 2024

Web Development Intern

Remote

- Built a Resume Builder and Job Listing Portal using the MERN stack — React frontend, Node/Express backend, MongoDB — with secure cloud storage for user data.
- Delivered end-to-end features across both products in an agile team environment, gaining hands-on experience in full-stack web development.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Java, C, C++

Frontend: Next.js 15, React, Tailwind CSS, HTML/CSS, Recharts

Backend: Node.js, Express.js, REST APIs, JWT Auth

Databases: PostgreSQL, MySQL, MongoDB, Prisma ORM, Mongoose

AI / Cloud: OpenAI API, Clerk, Vercel, Render, Supabase, PgBouncer

DevOps: GitHub Actions (CI/CD), Git, Postman, VS Code

CERTIFICATIONS & ACHIEVEMENTS

- **Published:** "Electronic Voting System Powered by Blockchain Technology" — ICCS 2023, SSRN
- **1st Runner-Up** — Hackathon, Reva University (May 2021)
- The Complete 2024 Web Development Bootcamp — Udemy | DSA — CipherSchools | Python Bible — Udemy
