SUMMARY

Full-stack developer with experience in building and deploying web applications end-to-end. Comfortable working across the stack — REST APIs, relational databases, React frontends, and cloud deployment with CI/CD. Interested in Software Development, SDE, AI, and Full-Stack roles.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Java

Frontend: Next.js 15, React, Tailwind CSS, Recharts

Backend: Node.js, Express.js, REST APIs, JWT Auth

Databases: PostgreSQL, Prisma ORM, MongoDB, MySQL

AI / Cloud: OpenAI API, Clerk, Vercel, Render, Supabase, PgBouncer

DevOps: GitHub Actions (CI/CD), Git, Postman

PROJECTS

Ledgr.ai | *Next.js 15, TypeScript, Express, PostgreSQL, Prisma, OpenAI, Clerk, GitHub Actions* | [Live](#) | [GitHub](#) May 2026

- Built a full-stack AI finance dashboard as a TypeScript monorepo with a Next.js 15 frontend deployed on Vercel and an Express backend on Render, connected to a PostgreSQL database on Supabase.
- Implemented JWT authentication using Clerk — verified tokens in Express middleware and mapped Clerk user IDs to internal PostgreSQL UUIDs to keep auth and relational data cleanly separated.
- Integrated OpenAI GPT-4o mini for automatic transaction categorization and monthly spending insights; designed the database schema with `DECIMAL(12,2)` for money and composite indexes for dashboard queries.
- Set up a two-stage GitHub Actions pipeline — a lint, typecheck, and build gate on every PR, and a deploy hook to Render on merge to main; fixed several production bugs including a Prisma/PgBouncer prepared-statement conflict and CORS failures on dynamic Vercel preview URLs.

Blockchain E-Voting System | *Solidity, Ethereum, React, Node.js, MetaMask, Truffle* | [SSRN](#) Jan – Apr 2023

- Built a voting application using Ethereum smart contracts in Solidity with a React frontend and MetaMask wallet authentication; votes were recorded on-chain rather than in a central database.
- Published a paper on the architecture and design at **ICCS 2023** and SSRN.

EXPERIENCE

Zidio Development June 2024 – Sep 2024

Web Development Intern *Remote*

- Built a Resume Builder and Job Listing Portal using the MERN stack (React, Node.js, Express, MongoDB) with cloud storage for user-uploaded files; worked in an agile team and contributed across both frontend and backend.

EDUCATION

Lovely Professional University Aug 2021 – Aug 2023
MCA — CGPA: 8.01 *Phagwara, Punjab*

Reva University June 2018 – June 2021
BCA — CGPA: 8.41 *Bengaluru, Karnataka*

CERTIFICATIONS & ACHIEVEMENTS

Published: “Electronic Voting System Powered by Blockchain Technology” — ICCS 2023, SSRN

Award: 1st Runner-Up, Hackathon — Reva University (May 2021)

Courses: The Complete 2024 Web Development Bootcamp — Udemy | DSA — CipherSchools | Python Bible — Udemy
